

A full-page photograph of a surfer riding a barrel wave. The surfer is shirtless, wearing blue shorts, and is positioned in the center of the wave's tunnel. The water is a vibrant turquoise color, and the wave is curling over him, creating a dramatic, enclosed space. The background shows the ocean and a clear sky.

INTRODUCTION

SHAPERS AUSTRALIA® is a core, grassroots surf company evolving out of the global surfing hub that is Gold Coast, Australia. For over 30 years Shapers® has been arming leading surfboard manufacturers at home, and around the world, with the tools, materials and knowledge that drive quality surfboard design and production. This includes major technology advances such as Shapers® SPINE-TEK®, that have taken surfboard performance to new heights.

Shapers Surf Hardware is an extension of our partnership with surfboard manufacturers and professional surfers, together we are united in advancing the surf industry through the ongoing research and development of surfing products that are functional, performance enhancing and relevant to all surfers, in all conditions. It is a pleasure to have you on board as an integral member of this partnership.

FIN CONSTRUCTION

CORELITE

Shapers CORELITE construction has been a feature in the Shapers Fins range since day one. A famous construction that helps create a lightweight fin with a progressive flex pattern. CORELITE Fins have a medium level of flex which is responsive, yet more forgiving than alternative constructions.

Overall, CORELITES have a balanced feel that will perform across a full range of surf conditions.

AIR LITE

Shapers new AIRLITE construction is a specialised ultra-light-weight core that is shaped to create precision foils.

AIRLITE's strength-to-weight ratio is a major benefit whilst providing an all-round balanced flex pattern that is smooth and predictable.

AIRLITE constructions are featured throughout Shapers fins range and are the perfect match for the Global Surf Series (S.P.F / F.P.R / C.A.D).

CARBONSTEALTH

Fast, Light, Responsive, Durable - CARBON STEALTH fins deliver on all accounts of performance. These fins benefit from their elastic potential energy, engineered to flex and load, then release energy, generating speed and power. STEALTH fins feature a stiffer base and leading edge that mitigates friction and delivers exceptional drive and control. The progressive flex pattern through the fins tips ensures a responsive feel, fuelled with a kinetic energy that takes progressive surfing to the next level! CARBON STEALTH fins are the most popular moulded fin choice of the Shapers Professional Surf Team.

PROGLASS

HAND FOILED
PREMIUM
FIBREGLASS

A legendary blast from the past, re-calibrated to meet the needs of modern-day surfing. These beautiful hand-foiled full glass fins deliver a natural feel with a predictable flex pattern, featured in fin templates that are purpose-built for solid all-round surfing.

Shapers PROGLASS fins are made from solid layers of fibreglass resulting in a heavier and more durable construction.

This stiffer flex pattern works to mitigate vibration, ensuring greater control, particularly in fast, overhead waves that pack power.

Shapers PROGLASS fins are also extremely popular as Hand-Foiled fin models in our Longboard and Twin Fin range.

☐☐ F-AL-CAD-XL

Control. Acceleration. Drive. The C.A.D series is designed to accommodate a wide range of surfboards and surf conditions. This reliable all-rounder offers a balanced feel, through a neutral template and medium flex pattern. The C.A.D series provides a controlled feel whilst delivering the acceleration and drive required to perform a full range of manoeuvres through to the highest levels of surfing.

S.P.F LARGE

 F-AL-SPF-L-F

 F-AL-SPF-L

Speed. Power. Flow. S.P.F fins drive hard off the bottom. They are quick off the top and hold rail through powerful turns. These fins promote fast, powerful surfing with continuous flow. S.P.F fins feature a refined fin tip that delivers speed down the line and release through progressive turns. The fins leading edge engages with a responsive feel, whilst the raked template ensures extra hold through carves. S.P.F fins are well suited to boards with a medium to extreme rocker, they love the open face, and waves that allow multiple manoeuvres; such as point breaks.

PROGLASS

Soli Bailey, a former Volcom Pipe winner and active WSL competitor. A genuine charger that surf's with speed and power. We are stoked to launch the Soli fins! Suited to a wide range of modern surfboard designs. Bevelled leading edge, smooth, ultra fast, powerful and controlled. Soli's fins come in both CARBON STEALTH and PROGLASS construction, to give surfers a choice in flex patterns. Soli loves the STEALTH flex pattern in small to medium surf for their energetic and responsive feel. For larger surf that demands extra hold and control, Soli unleashes the PROGLASS model.

☐☐ F-ST-REEF-L

Reef Heazlewood is a superstar in the making, considered one of the best air guys and barrel riders on the planet. Reef is aiming to qualify for the WSL Championship Tour, and his fins are purpose-built to help him achieve this goal. Whilst Reef's fins are in the "carve" class with their sweeping outline, the set-up is more reactive than fins typically described as raked. These gems will perform in any condition, engaging quickly whilst driving and holding through full rail carves. Reef's fins feature a smaller centre fin, reducing drag whilst providing release when desired.

MATT BANTING

THRUSTERS / ATHLETE SERIES

CARBONSTEALTH

MB MEDIUM

 F-ST-MB-M-F

 F-ST-MB-M

MB LARGE

 F-ST-MB-L-F

 F-ST-MB-L

Matt Banting is considered by many as one of the best surfers in the world. Ultra smooth with a powerful rail game and a box of tricks that puts him in the ridiculously talented category. As Matt has grown stronger, his power surfing has accelerated, demanding more drive and hold. Matt gets release by putting his board above the lip, when on the face, he is all about speed, power and flow. Matt's fins accommodate rail surfing in performance boards with mid to extreme rocker. Due to their ability to load up and project, Banting's choice is the Carbon Stealth construction.

Note: Matt's fins include an additional centre fin to mix it up and add diversity to the fin set-up. The smaller alternative centre fin is designed to reduce drag, increase responsiveness and provide extra release. A good option for lighter surfers and/or smaller waves.

CUSTOM SERIES

THRUSTERS / CUSTOM SERIES

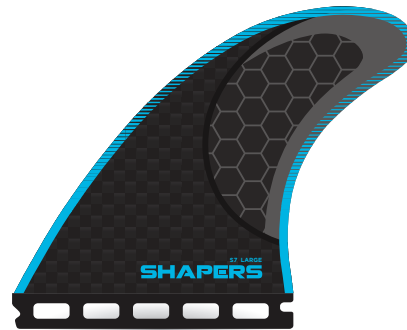

ELEMENT ML

📏 F-ST-EMT-ML-F

📏 F-ST-EMT-ML

CARBONSTEALTH

Originally designed by Shapers for team riders who found the AI Merrick medium to small & the AI Merrick large to big. Speed, power, flow, release... Element has it all.

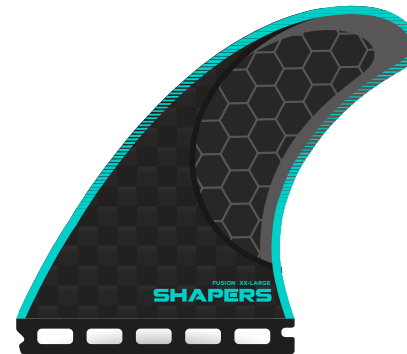

S7 LARGE

📏 F-ST-S7-L-F

📏 F-ST-S7-L

CARBONSTEALTH

A balanced template with a pivotal influence, Shapers S7 features Inner Foil Technology that helps provide lift whilst reducing drag and tightening turns.

FUSION XX-LARGE

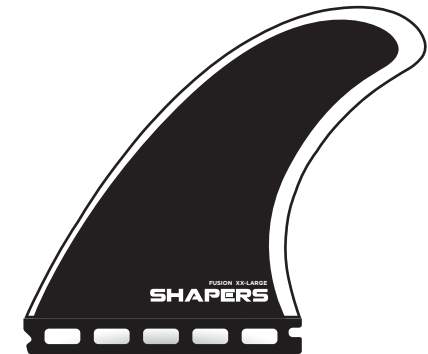

📏 F-ST-FSN-XXL-F

📏 F-ST-FSN-XXL

CARBONSTEALTH

Designed for the heavier surfers that demand performance, however, FUSION (formally S9) is an incredibly versatile template. A popular option for Hybrid Surfboards that benefit from the extra drive and pivot that Fusion provides.

Fusion is also surfed as Quad Fin sides, Mid-Length Thrusters and as a performance set-up in Longboards & SUP's.

PROGLASS

The AM series is legendary! Developed by Al Merrick and his team of professional surfers many moons ago, AM fins have stood the test of time and remain one of the most popular fin templates in the world. All of Shapers team riders have AM's in their fin quiver for the simple fact they perform at the highest level in all surf conditions. AM fins are famous for exceptional speed, drive and release off the top. The raked template draws out rail curves whilst the smaller centre fin reduces drag, promoting speed turns and tail release.

AM's fall into the all-time, must-have category!

F-6.5-DRIFTER

DRIFTER 7.0"

F-7.0-DRIFTER

Mid 6.5" - A versatile fin combo, designed to perform across a full range of mid-lengths.

Hand-foiled ProGlass Volan construction, delivering optimal drive and control.

Drifter Series - Hand foiled Gems, designed to perform across a wide range of boards and surf conditions.

The Drifter excels as a single fin or as a 2 + 1 setup. A popular template for mid-length surfboards.
